

Exercise

Combining data I

1. Create a staging query sEmployee containing all the columns from the **Employee.xlsx** file
2. Create a staging query sTeam with *TeamNr* column, referencing the sEmployee staging query (this is equal to the Team query made earlier)
3. Create an Employee query, merging sEmployee and sTeam and containing a *TeamNr* column and a *FullName* column

	EmpNr	Role	FullName	DateOfBirth	TeamNr
1	10001	CEO	Martin, Finola	23-3-1993	1
2	10010	Vice President Americas	Wright, Callisto	7-1-1955	1
3	10020	Vice President Europe	Vlootman, Henk	3-1-1972	1
4	10030	Vice President Asia Pacific	Walker, Amida	27-2-1973	1
5	10101	Unit Manager Americas 1	Rozema, Michiel	19-6-1971	2
6	10102	Unit Manager Americas 2	Murphy, Ginevra	22-11-1962	2
7	10103	Unit Manager Americas 3	Robinson, Oliver	21-11-1969	2
8	10201	Unit Manager Europe 1	Kelly, Arthur	1-5-1958	3

Exercise

Combining data 2

1. Load all the sales files in the Sales folder
